JOB EXPERIENCE

- Network Core & Application | Next Town Technology Ltd | **May, 2021 - Present**

KEY RESPONSIBILITIES

Network Infrastructure:

- Monitored service status, ensuring real-time awareness of client network performance.
- Delivered first-hand support for client service issues, **troubleshooting** and **resolving** incidents promptly.
- Lead and support, installation of **VSAT/Starlink** and **Fiber Optics** internet services, ensuring optimal network connectivity.
- Coordinated with clients and internal teams to deliver **on-site support** for complex installations and configurations.
- Conducted network cabling using **CAT6** and **Fiber Optics**, ensuring efficient data transmission across networks.
- Configured and **maintained network** devices such as **Cisco** routers, switches, access points, and servers (**Ubuntu and Windows**).
- Ensured network reliability by regularly updating and securing all connected devices.

Cloud Technology R&D:

- Researched and evaluated Cloud platforms, including **AWS**, **Cloudflare**, and **Hostinger**, to identify and develop marketable solutions for the company.
- Developed **cloud-based products** to meet the evolving needs of clients.

Website Design & Development:

- Designed, built, and maintained company and client **websites**, ensuring high functionality and user-friendly interfaces.
- Ensured consistent uptime and performance of websites by monitoring and optimizing web servers.

Database Design & Development:

- Designed and developed **relational databases** to support business applications and processes, ensuring data integrity and efficiency.
- Created and optimized **ER diagrams** (Entity-Relationship Diagrams) to map out database structures, and relationships.
- Proficient in writing **SQL queries** to extract, manipulate, and manage data efficiently.
- Worked extensively with **MySQL** to design and implement databases for websites.

ACHIEVEMENTS

→ Design & build a custom **Fullstack Websites**:
nexttowntech.com.pg | **tatisports.com.pg** | **sportstok7s.com**.
→ Provide a **Cloud Hosting** solution to host **websites** and **emails** as a service.
→ Successfully implemented a **website** and **email** solution as a service product.
→ Configure **Cisco Enterprise Router** for **NATing** for **Internet**, **VLANs** and **Internet Failover**
→ Research and successfully implement **OpenVPN** for **Remote Access** and **P2P** tunnelling.
→ Design and implement a **GPON** distribution for a subscription base **Internet Access**.
→ Successfully led **VSAT/Starlink** installation.
→ Research, design & implement **File Storage** with **Proxmox VE**, **TrueNAS**, and **OpenVPN.**

SOFTWARE & TOOLS

Office
- MS Office
- Google Workspace

Programming
- Visual Studio / VSCode
- XAMP (Apache, MySQL, PHP)
- Git Version Control

System Design - draw.io

Graphics - Adobe Photoshop & Illustrator

Database
- phpMyAdmin
- MySQL / MariaDB
- SQL (Sequence Query Language)

Programming Languages - Python, PHP, C#

EDUCATION

- University of Papua New Guinea | **2016 - 2019**
  - ➔ Bachelor of Science - Physics - Electronics & Computing Strand
